The 8100 compression adjuster is located in the remote reservoir assembly. The remote reservoir serves as an extension of the shock absorbers vital elements: oil and nitrogen. The remote reservoir theory allows for the use of increased volumes of oil and nitrogen while allowing for smaller shock packaging.

Or complete your truck suspension with help from Belltech, Skyjacker, Rancho, McGaughy's Suspension, or other top-quality shocks and struts. From basic performance shocks to externally adjustable and velocity-sensitive designs, all the latest shocks and struts are here!

Shocks and Struts at Summit Racing

Since the shock controls the motion of the spring, increased spring rates require more rebound damping for control and that is one of the reasons why KONIs are rebound adjustable (and some are double adjustable). Using higher rate springs with OE or soft shocks will very quickly overcome and wear out the shocks.

KONI NA | Sport (Yellow)

QA1 shocks have either 1 or 2 knobs. Each knob has 18 damping settings; there are 6 clicks per revolution, and each knob has 3 complete revolutions. This gives you many possible valving options. Adjusting them for your vehicle and intended driving style is easy!

How to Determine Your Valving on QA1 Shocks

The most popular Koni adjustable shocks are from the Koni Sport Yellow line, but many Koni Classic Red and Black shocks are manually adjustable, along with coilover kits, RV shocks, race shocks, and more. There are three different adjustment procedures for Koni adjustable shocks that are conveniently grouped by part number.
