Grow medium systems, using clay pebbles, coco coir fiber, or rock wool are often preferred by beginners. These growing mediums offer good drainage as well as room for beneficial bacteria to develop. There are a few diverse ways of how to build an aquaponic garden.

How to Build an Aquaponics System - Gardening Tips

The key to aquaponics is the natural bacteria found in the growing bed (called the biofilter) . The bacteria eat ammonia and turn it into nitrates, which are great food for plants. Without these nitrifying bacteria, the fish would die in their own waste. Without the nitrates, the plants wouldn’t have anything to eat.

Complete Guide to DIY Aquaponics and Aquaponic Gardening

Building an Aquaponic System: Aquaponics is the combination of aquaculture and hydroponics. In aquaponics, the nutrient-rich water that results from raising fish provides a source of natural fertilizer for the growing plants. As the plants consume the nutrients, they help to pur...
