### Service Your Car | Car Talk

An automatic transmission, also called auto, self-shifting transmission, n-speed automatic (where n represents its number of forward gear ratios), or AT, is a type of motor vehicle transmission that automatically changes the gear ratio as the vehicle moves, meaning that the driver does not have to shift the gears manually. Like other transmission systems on vehicles, it allows an internal ...

### Automatic transmission - Wikipedia

Exactly this. I'm from Europe, and automatic cars are just starting to be relevant here. I drive manual cars for 20 years and I do it without thinking about it. Changing gear is automatic, it doesn't matter if I'm in a conversation, completely concentrated on the road or thinking about something else, I never engage the wrong gear or stall the car.

### Automatic transmission safer than manual? : cars

If you have ever driven a car with an automatic transmission, then you know that there are two big differences between an automatic transmission and a manual transmission: There is no clutch pedal in an automatic transmission car. There is no gear shift in an automatic transmission car.
