Daihatsu Trouble codes - Wiring Diagrams

Does the vehicle have poor engine idling? If so, this sounds like a coil pack failure. The engine should be idling at just below 1000rpm, instead of idling erratically, with the rev needle jumping up and down irregularly. Another common symptom of a failed coil pack is a lack of power and possible engine cutting out.

Daihatsu Terios: Common Problems and Solutions ...

The Daihatsu Terios (Japanese: ダイハツテリオス, Daihatsu Teriosu) is a mini/compact SUV, first released in 1997 by the Japanese car manufacturer Daihatsu as the successor to the F300 series Rocky. The name "Terios" is originated from the Old Greek word, which is roughly translated to "making

Knock sensor wire missing - Terios / Taruna - Daihatsu club

To test the old sensor, you'll need a thermometer and multi meter. Tie a piece of wire around the sensor, and let it hang inside a pot. Fill the pot with water to cover the sensor up to the thread. Connect 2 wires to the sensor(2.5mm female terminals will do) for the connection, long enough so that you can measure resistance without scalding yourself.
