Got the same message on my dashboard 'engine failsafe prog' I believe its time for new spark plugs. My RPM's jump at a cold start between 700 -900 . I also got codes P0120 and P0221 but I don't know what those are . If anyone can help me out I would gladly appreciate it . 12-08-2015, 03:14 PM #16.

ENGINE FAILSAFE PROG??? please help

The "Trans. Failsafe Prog" warning is a little bit of a "catch-all" solution in that, anything that the computer in your car deems a potentially damaging threat to the correct operation of your transmission will cause it to go into failsafe. For the sake of brevity, we will count any faults within the transmission itself as one thing.

This light comes on when the car's engine management system senses a fault or missing input signal, and puts itself into a safe mode. This has nothing to do with oil service, coolant level, etc. It is a failed component or operating range out of spec or missing sensor signal that is causing this light.

ENGINE FAILSAFE PROGRAM - 2002 BMW X5

The engine computer constantly monitors the accelerator pedal and compares this with the throttle position, and if something is out of parameters the engine computer puts the car into engine fail safe, which is good enough to get you to the side of the road. It does not allow the engine to run good enough to just about do anything else.
