Immune System Power Notes Answers

Immunology Definition "The study of the immune system, the cell-mediated and humoral aspects of immunity and immune responses." Immunology is a branch of the biology involved with the study of the immune system, components of the immune system, its biological processes, the physiological functioning of the immune system, types, its disorder and lot more.

Immunology- An Overview of Immune System, its Types, Disorders

The immune system has two components: innate and adaptive immunity. The innate immunity is present in all metazoans, while the adaptive immunity only occurs in vertebrates. The innate system relies on the recognition of certain foreign molecules to stimulate two types of innate immune responses: inflammatory responses and phagocytosis. The adaptive system, on the other hand, is composed of ...
