Lean Six Sigma Value Stream

Value stream mapping

Read PDF Lean Six Sigma Value Stream Mapping is a technique — developed from Lean manufacturing — that organizations use to create a visual guide of all the components necessary to deliver a product or service, with the goal of analyzing and optimizing the entire process. The process of creating a value stream map takes all the necessary people, processes, information and inventory, and displays

The value stream
represents the steps
taken to deliver the
specific product or
service. (In this way it
is different from a
value chain, which is

usually defined over broad functional areas rather than a specific product). Value Stream Analysis (VSA) is a key tool of Lean Thinking. Value streams may be generated a number of ways.
