Leather processing | Leather Panel

The leather making process is in general restricted to batch processing, but if the surface coating sub-process is added then some continuous processing can be included. The operation flow has to follow the preparatory → tanning → crusting → surface coating sub-process order without deviation, but some of the sub-processes can be omitted to make certain leathers (or partially tanned/ untanned products).

Amazon.com: Customer reviews: LEATHER PROCESSING & TANNING ...

The "tan" part of the word "veg-tan" refers to tanning, which is the process by which the skin of an animal (after removal from the body) is treated so that it will not decompose and biodegrade (rot away and stink to high heaven!) therefore becoming a durable material that can be used to make things from. In the "olden days" I believe they used ...
