### Software Engineering: Principles and Practice

Software maintenance is recognised as a key area in software engineering [9, 163]. Despite this, many mainstream software engineering courses are biased towards the development of new software systems at the expense of issues surrounding changes to these systems after they become operational [70]. Our intention is to produce a text that presents:

### Software Maintenance: Concepts And Practice (Second ...

Software maintenance in software engineering is the modification of a software product after delivery to correct faults, to improve performance or other attributes.. A common perception of maintenance is that it merely involves fixing defects.However, one study indicated that over 80% of maintenance effort is used for non-corrective actions. This perception is perpetuated by users submitting ...
