I've always suggested that folks turn the PDF into an JPG image, drop it onto a Google Slides page, and then draw text boxes on top of the image that kids could fill in on the screen. Amy Almada, problem-solver and teacher tech goddess, just took this process next level by modeling the simple path and teaching us her special "background" trick.

Kinematic equations relate the variables of motion to one another. Each equation contains four variables. The variables include acceleration (a), time (t), displacement (d), final velocity (v_f), and initial velocity (v_i). If values of three variables are known, then the others can be calculated using the equations. This page demonstrates the process with 20 sample problems and accompanying ...
